ECONOMIC LIFE AND FIXTURE RANGE GUIDELINES

Under normal conditions, the recommended economic life and fixture range are to be used. If a different economic life or fixture allocation is necessary, it must be approved by the supervising appraiser.

COMPUTER TRENDING GUIDELINES

- During the Property Statement Season (March through June), personal property and fixtures are valued (trended) by using the *Business Personal Property Assessment System* (PP System). Trending of reported costs is facilitated by the use of Personal Property (PP) Types (also known as trending codes). In the valuation process, a particular PP Type serves the following functions: identifies the category of equipment being appraised, identifies the recommended economic life and fixturization to be applied to the equipment (in some cases), and identifies the trend factor table to be applied to the historical costs.
Appraisers begin the process by identifying and/or verifying the general Business Classification Code (BCC) category of the assessee (i.e., commercial, industrial or others). The BCC category aids the appraiser in the selection of the proper personal property type for each category of equipment reported on *Business Property Statement*, BOE-571-L, ASSR-49, PP-86 (BPS) or any supplemental schedule.
- The following table includes a listing of available trending codes and guidelines on economic life and fixture ranges as recommended by the Los Angeles County Assessor's Office for various commercial and industrial businesses. The economic lives are as recommended by the California Assessors' Association (CAA) and the State Board of Equalization's (BOE) Property and Special Taxes Department, with the input from both the Assessment Services Division and appraisers of the Los Angeles County Assessor's Office.

MANUFACTURING AND INDUSTRIAL	Economic Life	Fixture % Range	PP Type
Aerospace:			
Aircraft Overhaul and Repair	10	40-55	I21
Airframe	12	40-70	I21
Electronic Component Parts	10	40-55	I21
Mechanical Component Parts	12	40-70	I21
Apparel/Garment	12	20-30	I21
Automotive:			
Assembly Parts	12	80	I21
Component Parts	12	80	I21
Batch Plants (Concrete and Asphalt)	20	80	I21
